

How do I access the RevolutionPHR Patient Portal?

Instructions

1. Navigate to the practice Patient Portal login page. <https://revolutionehr.com/patient-portal/login>
2. Select 'Login'.
3. Enter the email address on file for the patient.
4. Retrieve the six-digit one-time passcode sent to the email address.
5. Enter the one-time passcode to complete login.

Each patient must have a unique email address. Shared or family email addresses cannot be used for multiple patient accounts. Children with a parent/guardian listed as guarantor can use the same email address.

Authorized caregivers, parents, or guarantors can access multiple linked patient accounts using the **Authorized Patients** feature once patient relationships are configured in RevolutionEHR by Dr. Montgomery's office staff.

After logging in, select the username in the top-right corner of the Patient Portal and choose a patient from the **Authorized Patients** list to switch between linked accounts without logging in again.

VISION SOURCE

FYI Office Staff:

New Patient Portal: <https://revolutionehr.com/patient-portal/home>

Must have an email address to use the portal.

They will get a **passcode** to the email on file EVERY time they log in. No passwords.

Each patient must have a unique email address; shared or family email addresses cannot be used for multiple adult patient accounts. Children can have parent's email address if parent is registered as guarantor.

They can access multiple patients if those are checked for access in Rev

Patients can cancel appointments from the portal.

Expired Rx's are no longer printable or viewable.

We MUST update each account by adding their email address on file to the new drop down in REV and check any authorized patients or representatives they want to have access to each other.
